### ARLU, THE REFERENCE FOR OPENING DOORS

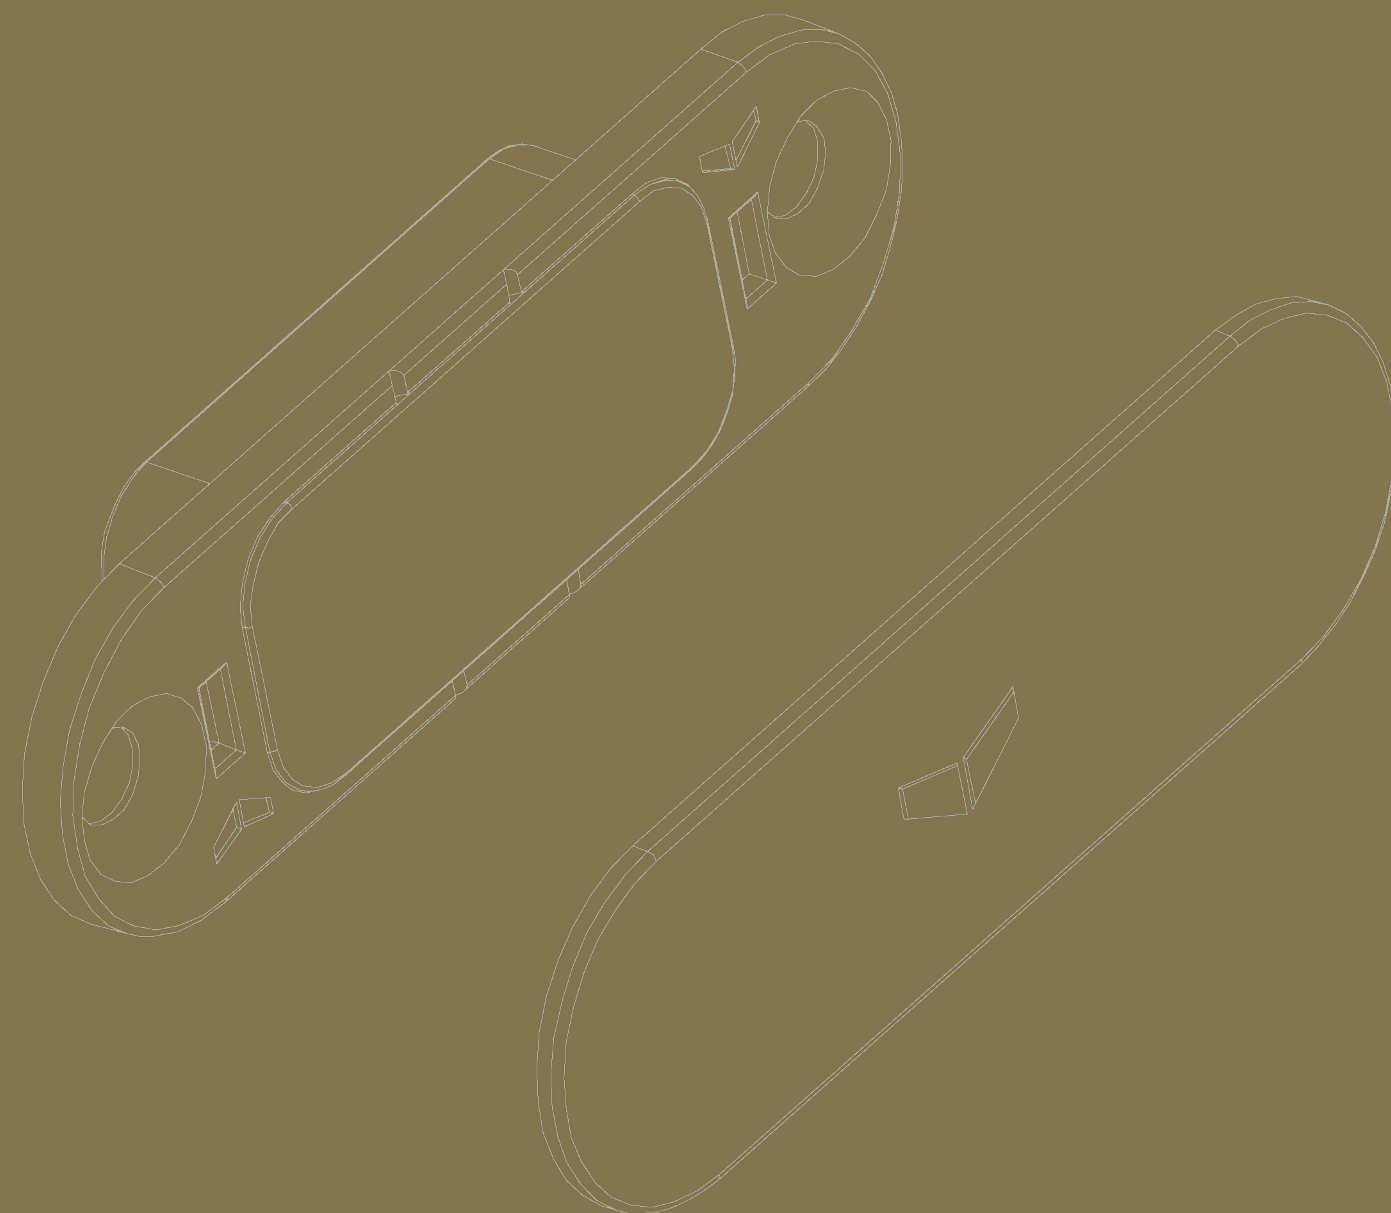

ARLU is the leading reference in *opening doors*. With a strong focus on design, functionality and innovation, we craft architectural hardware that blends aesthetics with precision engineering. Our solutions are crafted to enhance both interior and exterior spaces, offering architects, designers, and builders the tools to realize their vision. From sleek, modern lines to solid, durable mechanisms, ARLU products embody quality and creativity. From stylish homes and offices to hotels and restaurants, our hardware opens more than just doors, it opens possibilities. Discover how ARLU redefines access and elevates every space with elegant and reliable door solutions.

ALL TECHNICAL DRAWINGS ARE SHOWN IN MILLIMETRES AND ARE SUBJECT TO CHANGE BY ARLU.

# 01

## LOCKS

Locks ensure reliable locking and smooth operation of the door, tailored to various applications and door types. Magnetic locks are the standard choice, but depending on the application, other types of locks are also perfectly suitable.

LOCKS

## ARLU **MAGNOTICA PRO E & SE**

The ARLU Magnotica® PRO E is a magnetic and contactless catch which holds interior doors shut without the need for a door handle or latch. Because there are no moving parts, the door can be opened and closed completely without making any noise.

# ARLU Magnotica PRO E & SE

The Magnotica® PRO E is a magnetic and contactless catch that allows interior doors to be held in a fixed position without the need for a handle or lock. Because there are no moving parts, a door can be closed and opened completely silently. The Magnotica PRO E pairs perfectly with the pivoting hinges and various door frames. The magnotica® PRO E is ideal in combination with all ARLU pivoting hinges and the ARLU Invisidoor® door frames. The contactless door closer can be used both vertically (reveal of the door leaf) and horizontally (top of the door leaf) on any type of door frame.

Magnotica®  
For simplicity, the Magnotica can be ordered without cover plates.

Magnotica® PRO E

Magnotica® PRO SE

## What are the benefits?

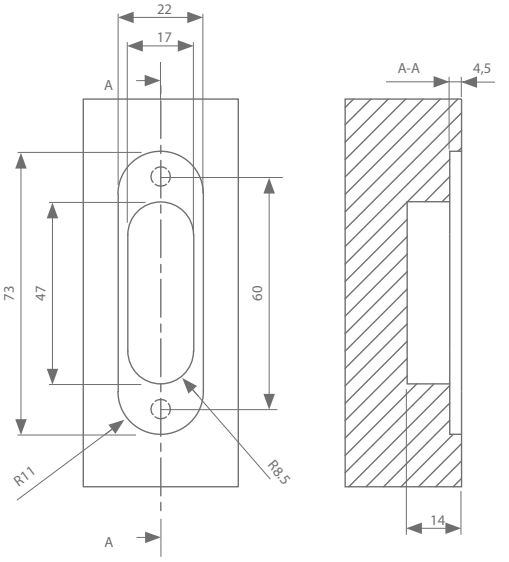

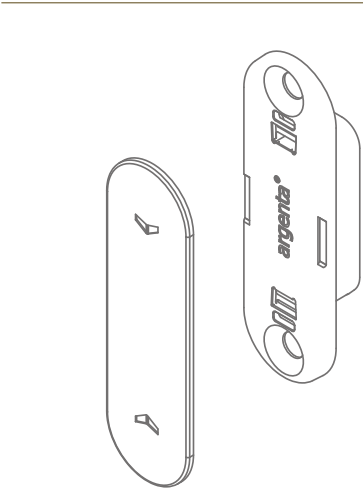

- No moving parts to wear out
- Silent mechanism due to no friction
- Door can be opened and closed noiselessly without a door handle or latch
- Doors can be opened and closed quickly and easily
- Ideal for doors to walk-in closets or storerooms
- Perfect for keeping pivoting doors in their closed position
- Thanks to the extra cover plate in zamac the screws are concealed
- Available in matt chrome, black, white and classic bronze

## Technical features

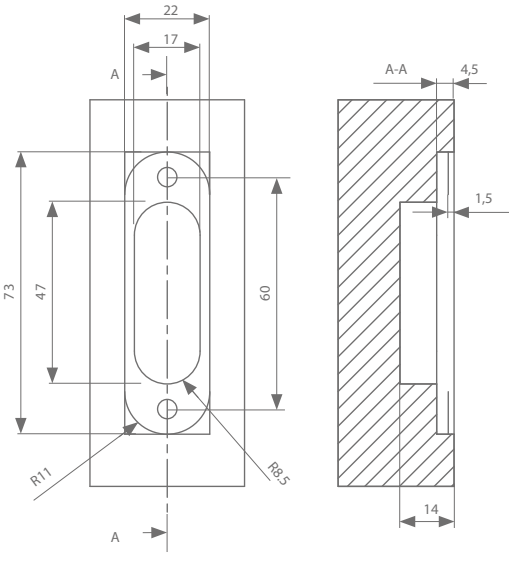

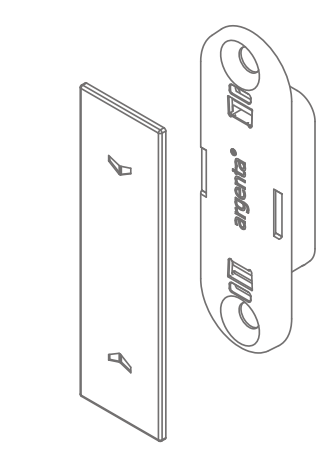

| Clearance | Magnetic power |
|-----------|----------------|
| 2 mm      | Minimum 40 N   |
| 3 mm      | Minimum 35 N   |
| 4 mm      | Minimum 30 N   |

## ARLU **LOCK & ADJUSTABLE LOCK PLATE**

A magnetic lock combined with an Arlu adjustable lock plate makes it possible to precisely adjust the closing side of the door. Thanks to the Arlu adjustable lock plate, the closing side of the door can be perfectly adjusted, ensuring an optimal and correct fit between the door and the door frame.

# Magnetic locks

In applications with the concealed door frames, the focus is on a sleek, minimalist finish in which the frame, hinges and fittings are fully integrated into the wall. To maintain this aesthetic result, concealed hinged doors are ideally combined with a magnetic lock. This type of lock ensures that no protruding latch is visible when the door is open, and also prevents scratches or damage to the frame when the door is closed. The following AGB and KfV locks can be used for this purpose. The wide range of colours also matches the colours of the concealed hinges perfectly.

| ● Black       | 80000218 |

# Adjustable lock plate

For AGB magnetic locks, it is best to use the adjustable PRO E lock plate on the frame side. This lock plate has a built-in magnet that helps to pull the latch of the magnetic lock into place, ensuring a smooth and secure closure. A major advantage is that you can still adjust the depth of the lock plate with a single cut-out. This allows you to ensure the door sits perfectly flush with the wall, even on the lock side. For steel and aluminium frames, it is best to use the PRO SE version, which features a rectangular cover plate. There is also an extensive range of colours available, allowing the lock plates to be beautifully matched to coloured locks and hinges. This ensures a sleek and uniform finish.

# Lock plate for KfV magnetic lock

A KfV magnetic lock is used in conjunction with its own lock plate. With a KfV deadbolt, an adjustable lock plate is used, as there is no night bolt.

# Edge sliders

Edge sliders are the solution for locking the passive leaf of a double door. They are discreetly concealed between the two door panels. Thanks to the different lengths available, there is a solution for every door height.
